? Question:

- How to import or export preferences?
- Is it possible to share user defined options with team members?

💡 Answer:

1 To export a preference file:

1. Select **File > Export...**
2. In the Export wizard: select **General > Preferences** and click **Next**
3. Click **Export all** to accept all of the preferences defined in the file
4. If you want to export only few preferences, choose them from the list
5. Click **Browse...** and locate the preference file on the file system
6. Click **Finish**

2 To import a preference file:

1. Select **File > Import...**
2. In the Import wizard: select **General > Preferences** and click **Next**
3. Click **Browse...** and locate the preference file on the file system
4. Click **Import all** to accept all of the preferences defined in the file
5. If you want to import only few preferences, choose them from the list
6. Click **Finish**

𝒊 Additional information:

- The configured preferences options can be exported and imported
- The Preference export is done at the workspace level, allowing easily sharing individual or group preferences
- For example: ECU Extract preferences, Auto connection preference options & rules
- The export wizard can be used to export preferences from the Workbench to the file system
- This is one of the features provided by Eclipse itself

- Therefore it works for example with following products:
    - ASCET V7
    - ISOLAR-A
    - ISOLAR-EVE
