Additional information:

* Please note: From EHOOKS 4.1.x and ASCET 6.4.x, only the most recent version of EHOOKS 4.1.x available at the time of the ASCET 6.4.x release is supported.

- This means:
  - We did not test all possible combinations - only the ones marked with " **yes** "
  - We strongly recommend to not use any other combinations as the ones marked with " **yes** "
    - Other combinations may show surprising behavior and are therefore not recommended
    - Even if they seem to work they most probably will not provide the full set of features

1 **ehTools

- In order to configure which EHOOKS version is used with ASCET:

1. Edit **<ASCET_installation_directory>\target\trg_ehooks\target.ini**

2. Add following line (if it does not already exist): **ehTools=<ehTools>**

3. Replace **<ehTools>** in this line with the according string provided in column **ehTools*** in the table above

- Example: In order to use EHOOKS V4.0 with ASCET V6.2.1 add following entry to file **..\ETAS\ASCET6.2\target\trg_ehooks\target.ini**

ehTools = EH400
