

Question:

- Cannot build code from my model
- There is following message:
 - *WARNING(WBd19): empty sequence call at block <block_name>*

Answer:

- Edit the sequence call:
 - The **sequence number** must be the highest number attached to that method.
 - Right mouse button click on the sequence call > **Next Number**

- As **sequence name**: Select the method the return value belongs to

Additional information:

- A method with return value has been declared in the component

- And the return value does not have a sequence call attached to it
- But this is required, because the method might be called by other components.
