DRIVING EMBEDDED EXCELLENCE

? Question:

**Why is it not possible to open calibration data manager (CDM) in INCA?**

I cannot open the CDM over the INCA menu bar or via the dataset and cannot make any changes on my datasets. Sometimes only a black screen is opened.

💡 Answer:

If the last saved CDM configuration contained a DCM/CDFX file which was saved on a network or local path and is not available anymore (deleted/shifted) the CDM cannot be opened.

To correct this behavior in INCA a new empty CDM configuration must be created:
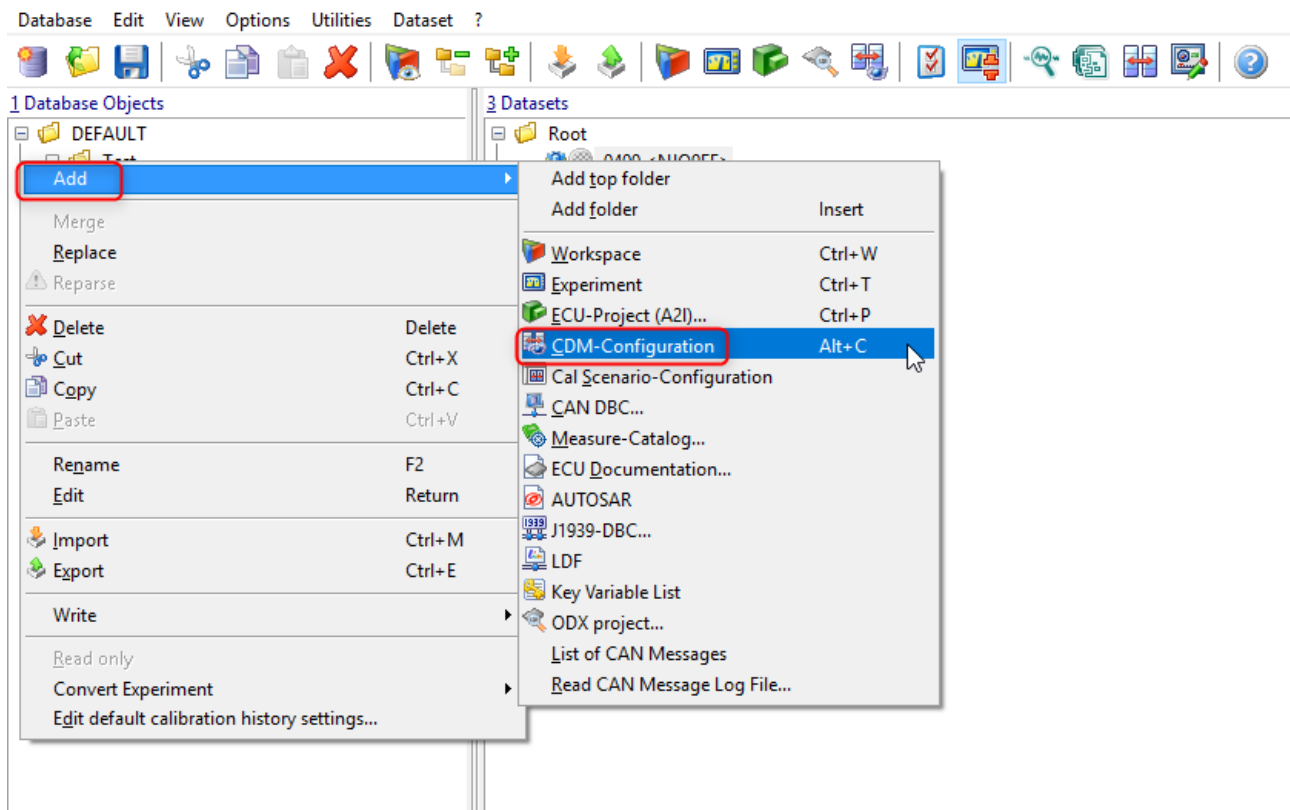

This newly created empty CDM configuration can be opened by double clicking on it.

Now add to the source any dataset and close the CDM configuration:
Now a request window pops up asking whether the CDM configuration should be saved. Please confirm this with "Yes":

Afterwards every other CDM configuration can be opened again or a dataset can be opened directly in the CDM.
