

## Question:

- Why do I get this dialog?
- Dialog *The path to the model is invalid. Please select the correct path.* pops up:

- This happens after I click on **Yes** in following dialog:
  - *Open module in modeling tool: Opening the modeling tool may need a minute. Do you really want to open the modeling tool?*

- How respectively where to configure the path to the model?

## Answer:

- This may happen for example when the project and/or the model was copied from another user
- Check if the path to the modeling tool is configured correctly in the module properties under **Model Directory**:
  - Navigate mouse pointer to the **module** and press **right mouse button > Properties... > Model Directory**: Check this entry (Does the directory still exist? etc.)
