

### **?** Question:

How to access INCA values from the Experiment Environment of LABCAR-OPERATOR?

### Answer:

INCA and LABCAR Experiment Environment will have to use the same Target Server version and a license for the feature Calibration Connector INCA (CCI) is needed.

If you have installed several versions of INCA, you can specify the version to be used.

This selection is executed during installation of the Experiment Environment but can be changed at any time.

To do so, please proceed as follows:

1. From the Windows Start menu, select

#### All Programs -> ETAS -> Experiment Environment 3.x -> Associate to INCA

or (Experiment Environment V3.7 and newer)

## All Programs -> ETAS -> Experiment Environment 3.x -> Experiment Environment V3.x Tools -> Associate to INCA

ETAS Experiment Environment 3.7 Experiment Environment V3.7 Tools			
Name	Date modified	Туре	Size
Resociate to INCA	13.12.2017 10:46	Shortcut	2 KB
🐻 Associate to RTA Trace	13.12.2017 10:46	Shortcut	2 KB

#### File path:

C:\Program Files (x86)\Common Files\ETAS\Experiment Environment\3.7\ETASShared\AssociateToINCA.exe

#### Run as administrator:

# ETAS

#### The "AssociateToInca" window opens:

AssociateToInca		
INCA, INTECRIO and LABCAR can access a target in parallel by accessing the same target server.		
INTECRIO supports INCA V7.2.2 (including newer Service Packs) and V7.1.10.		
Choose which INCA version you want to use.		
Default (No INCA connection) V7.2.4.137 (supported by INTECRIO and LCO) V7.1.10 (supported by INTECRIO and LCO)		
Associate Close		

- 2. Select the INCA version to be used from the list.
- 3. To enable your selection, click button "Associate".
- 4. The installation of the ETAS Target Server starts.
- 5. Follow the instructions of the installation routine.

### Additional information:

This article may also be relevant in case of certain Target Server problems, even if no INCA is installed or used.

In this case you may also select "Default (No INCA connection)" and click button "Associate".
